

Butterfly F8 Polymer Concrete Table

 Butterfly

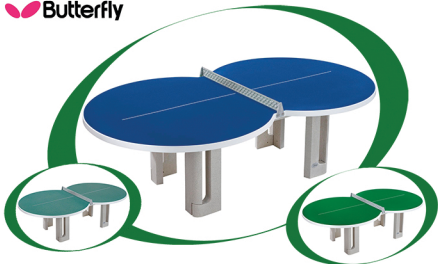

Table surface available in:  Blue  Green  Granite Green

Please note: Star Ratings for concrete tables are based on direct comparisons with other concrete models and bear no relation to ratings given to 'normal' tables! The Butterfly Figure 8 Concrete table tennis table has a 25mm thick steel clad, reinforced polymer concrete playing surface and a polymer concrete base with anchor points that allow you to secure it to the ground. It is supplied with a sturdy aluminium net which is 8mm thick. Whilst the figure of 8 shape adds a novelty factor to the game we feel it would discourage any serious players from using the table. Butterfly recommend their concrete table tennis tables for public play areas, schools and holiday parks.

Figure 8 shaped table tennis table: 250cm x 150cm
Weight: 345kg

5 year guarantee on table only
