

Kettler ASOX 1 Indoor Table

The Kettler Axos Indoor 1 took over from the Spin 1. The good points first: As with all Kettler indoor tables the Axos 1 has a very well finished 19mm thick playing surface and is supplied with a good quality net and post set, four descent bats and twelve balls. However, unlike most Kettler tables, the Axos 1 requires two people to open it, the net has to be removed every time it's folded, and only two of the four wheels steer (the other two are set pointing in one direction making it more awkward to move).
