FREIZEIT MARKE KETTLER

Before assembling or using the table-tennis table, please read the following instructions carefully. They contain important information for use and maintenance of the equipment as well as for your personal safety. Keep these instructions in a safe place for maintenance purposes or for ordering spare parts.

All Kettler products are designed in accordance with the latest safety regulations and undergo a constant process of quality control during manufacturing. The knowledge gained in this process is used to constantly improve and develop our products. In order to offer our customers the very best in product quality, we reserve the right to make technical changes at any time. In spite of this, should you have any cause for complaint, please contact your Kettler dealer.

Note on Safety

- The table-tennis table should be used only for its intended purpose, i.e. for playing with suitable table-tennis bats and balls.
- All other uses are prohibited and may be dangerous. The manufacturer cannot be held liable for damage or injury caused by improper use of the table.
- Damaged or worn components may endanger your safety or shorten the lifespan of the table-tennis table. Replace worn or damaged components immediately and remove the table from use until this has been done. Use only spare parts manufactured by Kettler.
- The table-tennis table complies with all safety regulations. Incorrect repairs, alterations to the design (removal of original parts, addition of other components etc.) may endanger the safety of the user.
- Instruct other persons (in particular children) using the table in

its correct use, and draw their attention to any potential source of danger, especially when setting up or dismantling the table.

- When setting up or dismantling the table, stay clear of its folding radius.
- When folded up, the table-tennis table presents a large surface to the wind. For this reason, ensure that it is stored in a sheltered position.
- The table-tennis table may be pushed only into the transport position (see p. 16, Fig. 1) because there is otherwise a danger of injury.
- The unit complies with the standard DIN 7898-1/10.97.
- Depending on frequency of use, check all screws, bolts etc. regularly to ensure that they are in good condition.
- In case of enquiry, please contact your Kettler dealer.

Handling the equipment

- Do not use the table-tennis table until it has been fully and correctly assembled and checked.
- Ensure that table-tennis tables which are not weatherproof are not exposed to dampness or rain. Keep them well away from direct sources of heat. Should the surface become warped, lay the table on a level surface for a few days.
- Set the table up on a level surface.
- Do not cover it with plastic foil, under which condensation may form. We recommend the weatherproof Kettler tarpaulin, art. no. 7032.

- For practising without a partner, the table halves can be folded up singly.
- For more information on the sport of table-tennis, you are referred to the specialist literature on the subject.
- Do not use corrosive or abrasive materials to clean the equipment. Ensure that such materials are not allowed to pollute the environment. In most cases, a slightly dampened cloth is sufficient.
- Please keep original packaging of this article, so that it may be used for transport at a later date, if necessary

Instructions for Assembly

- The equipment must be assembled with due care by two adult persons.
- Carefully read these mounting instructions before beginning with the work itself. The individual steps are additionally explained in the sequence of figures by means of symbols, in some cases a text mark indicates that a written explanation is avail-

able. Strictly follow the individual mounting steps to ensure a safe use and operation of the unit.

- To ensure that the table-tennis table is properly assembled and can be safely used, observe the instructions for assembly exactly.

List of spare parts page 18 and 19

When ordering spare parts, always state the full article number, spare-part number, the quantity required and the inspection number stamped on the back.

Example order: Art. no. 7122-500 / spare-part no. 94608005 / 2 pieces / inspection no.....

Important: spare part prices do not include fastening material; if fastening material (bolts, nuts, washers etc.) is required, this

should be clearly stated on the order by adding the words „with fastening material“.

1 Handhabungshinweise

(GB) Handling

(GB) **Folding the table halves down:** press the left-hand tip lock and turn the locking toggle into position. Hold the table firmly with one hand, press the right-hand lock and lower the table-half slowly into position. Never allow it to drop down!

2

GB **Folding the table halves up:** press the locking lever up and lift the table half upwards. Continue to press the lever during the first part of the upward motion.
